Oracle Fusion Cloud Implementation

Oracle Cloud Applications

Oracle Cloud Applications is the latest generation of enterprise applications from Oracle, providing state of the art business application software deployed in the Cloud. Oracle Cloud provides organisations with a platform to grow and stay competitive in today's challenging business times.

Business benefits

Moving to Oracle Cloud provides the opportunity to simplify and enhance your business processes and lower the total cost of system ownership. With the costs of upgrades built-in to the Cloud Services fee and removal of up front capital investment the implementation of Oracle Cloud Applications allows for a much lower cost of entry for customers than traditional ERP Software.

Moving to Oracle Cloud provides:

- Opportunity to simplify and enhance business processes
- Enable you to implement quickly with low risk and quick adoption
- Assurance that you are secure and compliant
- Lower the total cost of system ownership.
- Removal of up front capital investment
- Payment of a monthly fee

Our Oracle Cloud experts utilise technical tools, facilitate workshops and review questionnaires to agree the project scope and target processes. Our integration specialists will offer advice, help to shape your integration strategy, and implement integration solutions that ensure that all your systems run together, most efficiently.

We deliver proven methodology, industry-leading tools, prebuilt products, process design packs, and prebuilt dashboards which are supported by our global team of Oracle Cloud Suite experts.

We can:

KEY FEATURES

- Discovery Lead
 - Proven Methodology
 - Full Life Cycle
 - Fully Supported
- Advise on the best strategies and approach to implementing Oracle Cloud ERP
 - Reduce the cost and time to deliver your Cloud implementation
 - Enable you to implement quickly with low risk and quick adoption
 - Provide assurance that you are secure and compliant
 - Provide full 24x7 Managed Service Support

Discovery - Are you ready for Oracle Cloud?

At Global Minds we understand that deciding to implement Oracle Cloud Applications is a big decision. In order to ensure that it is the correct solution for you we undertake a Discovery Phase to quickly assess your objectives, evaluate your options and assess your readiness to move your business processes to The Cloud Fusion ERP, EPM SCM CX, HCM.

Our Oracle Cloud experts utilise technical tools, facilitate workshops and review questionnaires to agree the project scope and target processes. Our integration specialists will offer advice, help to shape your integration strategy, and implement integration solutions that ensure that all your systems run together, most efficiently.

We will carry out a short system discovery at no fee to

- Understand your systems and processes
- Set out a clear cost project scope and timelines
- Set out cloud options and other opportunities that can be implemented during the Cloud Implementation

The Discovery Phase enables us to quickly provide a precise fixed cost, project timeline and a commercial proposal. This discovery session comes with no cost to our customer.

Oracle Cloud Applications Support

Once you've implemented Oracle Cloud Applications, we help you maximise the value of your investment you throughout its lifecycle. We work with you to optimise your Oracle systems by using our expertise to provide proactive advice and support for patching new releases.

Our Value Proposition

Leading experts in Oracle Fusion Cloud and Oracle Technology, Global Minds will ensure your organisation gets the most value from Oracle Cloud Applications. We deliver expert advice, a proven methodology, and a professional and collaborative approach to implementation and project delivery. Using our proven project management methodology, our team of experienced, expert consultants will manage your implementation project end-to-end.

We offer **fixed price**, high value, managed risk projects with realistic scope and achievable timelines enabling you to plan with confidence. You will be supported by specialists who share decades of Oracle experience having implemented Oracle Applications from the earliest release of Oracle through to the very latest versions of Oracle Cloud Applications.

Whether you are transitioning to Cloud Applications from Oracle E-Business Suite or another ERP system you can rest assured that we can support you throughout the entire lifecycle.

We are best placed to help your business move to Oracle Cloud ERP because we are:

- A partner with a team of Oracle and business experts that don't just understand Oracle technology but know how to work with you to optimise the solution to best fit your business requirements.
- A partner who intimately understands business process, Oracle technology, integration with extensive experience of implementations and upgrades of Oracle ERP.
- Oracle Partner with Certified, Oracle specialist consultants following our proven methodologies to ensure all our projects are underpinned by our rigorous project management methodology.
- Focused on Customer Success ensuring our customers realise the business benefits and support the continual improvement of business process offered by Oracle Cloud Applications.
- We are a high-energy team with a passion for creating easy-to-use and accessible solutions. We strive to make the most difficult of tasks more intuitive.
