

Oracle Fusion Testing Services

Protect your Investment and your Reputation with Quality Testing

With Agile application development and continuous delivery, iterative and incremental testing is a new imperative. Early detection of issues and the identification of performance bottlenecks to mitigate risks using automated regression test suites is required.

Global Minds Testing Team plan, tailor, deliver and operate Oracle Cloud Application testing services to our clients providing scheduled monthly and quarterly testing cycles that are aligned with the Oracle online patching releases timetable.

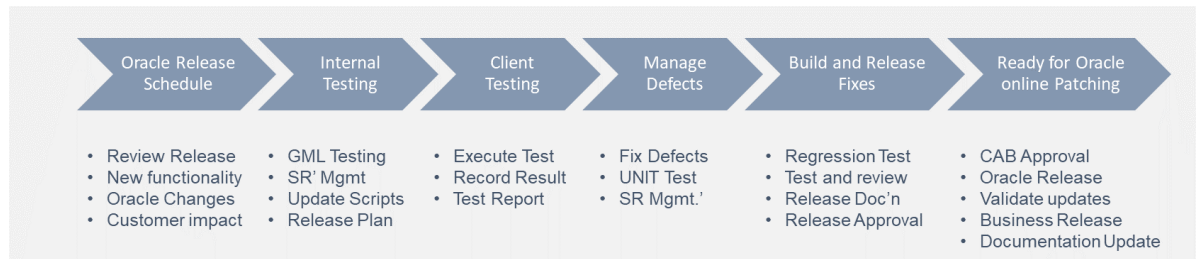

Automated Testing for Oracle Cloud Applications by Global Minds minimizes the risk of interruption or impact of changes and releases on your Organisation – allowing your business to focus on the system test automation benefits the updates provide.

KEY BENEFITS

- Full Life Cycle Services
- Embedded Agile Methodology
- Comprehensive library of ERP Scripts
- Automated Testing
- Defect and Release Management
- Progress Reporting
- Always up to date scripts
- Lower TCO
- Easy to Maintain

Aligned with Oracle Release Schedule and Release Cycle

Each customer has a set of bespoke automated regression tests developed and maintained at the latest release by GML – executed on your behalf each update cycle.

Global Minds have full life cycle testing services of integrated applications. Our service is tailored to each client and enables us to undertake regular and rigorous testing for

- Oracle PaaS Integration and Extensions,
- Oracle SaaS Fusion applications
- Oracle SAAS testing for inbound, outbound, and downstream integrations.

Global Minds testing services will ensure that all defects as per Oracle scheduled patch release are included within the test and that PaaS integrations and Extensions are verified and passed successfully.

A comprehensive automated testing and manual testing are performed to ensure all systems are ready for Oracle online schedule patching and verify that there will be no adverse impact on business continuity.

GML Automated Testing Suite

We offer an invisible tester solution with embedded and automated Fusion Cloud scripts which manage the full testing lifecycle. We design our testing tool based on our clients preferred testing tools such as SmartBear (#1 Gartner), Tricentis and Tosca, the #1 Continuous Testing platform.
