

Oracle EBS – Fastest Upgrade Ever

KEY BUSINESS BENEFITS

- Better user experience
- Additional functionality
- Extended Oracle support
- Better patch management
- Short upgrade cycle
- Fixed priced, reduced cost and risk
- 2 months full upgrade process
- 5 years warranty all customs

Move to the latest Oracle E-Business Suite 12.2.x using Global Minds' fastest upgrade process, methodology and pre-built diagnostic software that analyses the areas of focus for the upgrade - having many clients upgraded within two months.

In R12.2.x a number of technological and functional enhancements have been included along with changes to the UX providing a better overall user experience. There is also a push from Oracle as older versions are being de-supported.

These factors are prompting many organisations to upgrade to the latest EBS version.

The architectural changes in R12.2 requires a detailed analysis of the current infrastructure and the customizations to identify potential impact of the upgrade and a proven upgrade methodology to minimise the risk of an upgrade.

Value Proposition

Our upgrade process will consider multiple aspects including:

Upgrade to latest EBS version

Upgrade all CEMLI and re-implementation (if any)

No changes to the current business processes

Global Minds uses its **Discovery** solution to assess the impact of an upgrade. This solution has been built using pre-built diagnostic software and extensive experience based on many upgrades Global Minds has completed successfully. It consists of a number of tools and process steps to assess impact of the upgrade and provides foundation for a robust upgrade plan.

Many of the upgrade steps have been automated resulting in reduction in overall time for the upgrade and at the same time reducing risk due to missed out steps.

This discovery process, along with upgrade automation scripts and pre-defined templates allows Global Minds to complete upgrades typically between 1 – 2 months for a fixed price and guaranteed upgrade service.

Proof of Concept

After a quick discovery process, Global Minds expert analysis team can upgrade your test instance as a POC to demonstrate the capabilities in less than 72 hours. Our specialised upgrade team can analyse, upgrade your test instance and demonstrate how easy it is to upgrade your instance.

Upgrade Approach

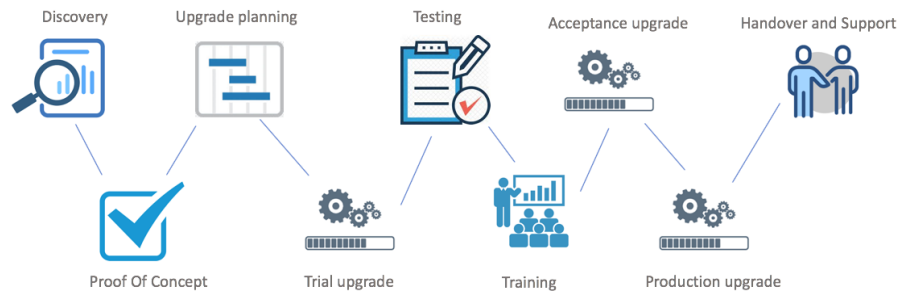

The upgrade team is a specialised team consisting of experienced DBAs, Technical developers, Functional consultants and Project managers who have done multiple upgrades and know typical challenges and ways to address them.

High level steps include:

- Discovery and POC
- Upgrade planning
- Trial upgrade process
- Conduct Testing, Training
- Acceptance upgrade process
- Pre-Production upgrade
- Production upgrade (DR upgrade)
- Handover and Support

KEY FEATURES

- Automated Discovery
- CEMLI Inventory
- Pre-built automated scripts
- Post upgrade checklist
- Proven methodology
- Specialist upgrade team

During each step, we work closely with the IT, key members and the support team to validate the upgraded system and enable them to carry on support and maintenance of the upgraded EBS application post completion of the upgrade.

Summary

There are a number of factors which are compelling EBS customers to consider an upgrade.

Global Minds has a sound solution and proven methodology to carry out the upgrade in a short period of time.

Let GML upgrade team help you move to the latest Oracle EBS version and complete your upgrade journey quickly and safely.
