

Oracle Fusion Reporting Services

Organisations today need to navigate in ever-changing market conditions. This requires integrated, real time insights and a common view of the business across all dimensions.

Analytics is fast becoming a decision-making process rather than a supportive tool. Organisations are looking for enterprise level competencies as opposed to tactical engagements. They require a data centric approach that collates structured and unstructured data from diversified sources and analysis leading to meaningful insights.

KEY BUSINESS BENEFITS

- Real time business insight
- Experienced cloud knowledge
- Industry and domain expertise
- Faster time to value
- Fixed priced, reduced cost and risk
- Low TCO
- Totally supported

Value Proposition

Global Minds aims to simplify your organisation's data driven reporting challenges by designing simplified reports in Oracle Cloud Applications. We achieve our goal by utilising our pre-build and reusable repository that has over 100,000 Oracle Cloud based dashboards and reporting packs for management and regulatory submissions.

The Reporting solution set includes a selection of pre-built dashboards and reports based on best practice KPIs. The whole solution set is based on a pre-built data model and data pipeline from Oracle Cloud Fusion which is synced with Oracle Cloud Fusion release cycles.

We have a set of comprehensive predesigned financials reporting packs from ledger balances to consolidations and financial submissions packs including cashflow, regulatory reporting, company house submission with IFRS, GAAP accounting requirements.

We undertake fixed priced design and development of 100 reports for your projects and additionally a 100 reports per year service. We have a large reporting factory which can make changes to the reports from the pre-built report sets or develop new custom reports. Most of the customisation requirements can be gathered with a single phone call, as we have specialists including Chartered accountants, industry experts and regulatory compliance experts who can understand your requirement quickly and accurately. In most cases we have reports already available within our pre-built pack that can be deployed with no or minor changes.
